

TRIAL RESULTS
EXECUTIVE SUMMARY

TOMATOES - CALIFORNIA

Research to determine the response of beefsteak tomatoes when treated with products containing SumaGrow® versus the grower standard.

RESULTS			
Treatment:	SumaGrow® + grower standard	Grower Standard (group A)	Grower Standard (group B)
Total Yield (cartons/acre)	1595	1428	1519
Increase using SumaGrow® product	-----	+ 11%	+5%

PRIMARY POINTS:

Crop: Beefsteak tomatoes
Location: California
Trial Date: 2016

TREATMENT SCHEDULE:

Grower Standard: 100% standard recommended fertilizer.
SumaGrow® + grower standard : 1 gallon per acre

Anecdotally, the grower made an observation that the treated group's tomatoes tended to be larger in size with less culls than the untreated groups.
