

TRIAL RESULTS
EXECUTIVE SUMMARY

COTTON - GEORGIA

Research to determine the output of cotton when treated with products containing SumaGrow® versus the grower standard rate of fertilizer.

RESULTS			
Treatment:	Lint/Acre	Seed/Acre	Net Profit/Acre
SumaGrow® + 50% grower standard	1531 lbs	1761 lbs	\$1,160.25
Grower Standard	1436 lbs	1651 lbs	\$1,098.50
Difference	+ 95	+ 110	+ \$61.75

PRIMARY POINTS:

Crop: Cotton
Location: Tifton, GA
Trial Date: 2014

TREATMENT SCHEDULE:

SumaGrow®: 1 gallon per acre (split application)
Grower Standard: 100% Recommended Fertilizer

RESULTS:

The fields treated with SumaGrow® showed a 95 pound per acre increase in cotton lint and a 110 pound per acre increase in cotton seed which equates to a \$61.75 per acre gain over fields treated with the Grower Standard.
